

## Pratigya Campaign partners come together to provide safe abortion and family planning services amidst COVID-19

*Ensuring access to safe abortion and family planning services amidst COVID-19, NGOs are working relentlessly to provide reproductive healthcare during the nation-wide lockdown*

**New Delhi, 30 April 2020:** Due to the COVID 19 pandemic, India's healthcare systems are heavily burdened to provide care to patients suffering from corona virus, testing populations for the virus and other allied services. Many facilities have been turned into dedicated COVID 19 centres to curb the spread of the virus; it means fewer facilities for other service delivery efforts.

During the lockdown, NGOs which provide contraception and safe abortion services in public sector to strengthen and further government's family planning program and mandate, like **DKT Janani, Family Planning Association of India (FPAI), Foundation for Reproductive Health Services India (FRHSI), and ParivarSeva Sanstha (PSS)** had to completely stop their outreach operations following the guidelines issued by the Government.

At the start of the lockdown over 100 clinics operated by these NGOs had also shut down. **However, responding to the needs of clients especially for time sensitive and essential sexual and reproductive health services, 70 clinics spread across 63 cities and towns across 15 states are now delivering safe abortion and post abortion family planning services.** Service delivery guidelines and protocols have been put in place to ensure the safety of clients and staff to prevent transmission of Covid 19. This include screening of clients coming in for service, maintaining social distancing and use of additional PPE's while providing services. To support clients at a time when mobility has been greatly restricted, NGOs have sent ambulances to transport clients to the clinics and back home.

Services at a glance:

- **DKT/Janani Surya Clinics:** Currently 22 clinics across the states of Uttar Pradesh (UP), Bihar, and Jharkhand are operational under DKT/Janani offering safe abortion (SA) services and Post abortion Family Planning (PAFP) services.
- **Family Planning Association of India:** Currently operating 35 clinics of which 27 clinics are offering both SA and PAFP. The remaining are offering Family Planning (FP) services only. These clinics are spread across 13 states and 1 Union Territory.
- **Foundation for Reproductive Health Services India:** Currently providing time sensitive safe abortion and family planning services in 3 clinics across Rajasthan and Uttar Pradesh.
- **Parivar Seva Sanstha:** Currently 10 clinics are operating in the states of Rajasthan, Uttar Pradesh, Bihar, Chhattisgarh and Karnataka, and are delivering SA and PAFP as well as other sexual and reproductive health services.

At a time when the nation is in state of lockdown where movement of people and services is near to none, access to contraception and reproductive healthcare can be severely impaired. When the pandemic broke, regrettably, NGOs had to suspend service delivery, but now with clinics opened across the length and breadth of the country, many women and girls would be able to access safe abortion services and post abortion care and family planning. The lockdown has had a disproportionately high impact on women and these organisations are working to iron out the difficulties by working closely with governments both at local and central levels to mitigate the crisis. We are hopeful that soon, women would be able to avail sexual and reproductive health services as before.

**Note to the Editor:** Service delivery is subject to availability of expert service providers and lockdown situation in that area.

**Annexure:**

1. Contact details of the clinics
2. About the organisations

**About Pratigya Campaign for Gender Equality and Safe Abortion**

Pratigya is a network of 110+ individuals and organisations working towards protecting and advancing women's rights and their access to safe abortion care in India, working with governments, organisations and media at the national and state levels. The advocacy coalition is guided by an expert panel-the [Campaign Advisory Group](#) Foundation for Reproductive Health Services India hosts the coalition secretariat and works closely with different stakeholders and government to reduce barriers to access to abortion.

## **Annexure II**

**About DKT/Janani:** The DKT Janani program began in 1995 as a pioneer of contraceptive social marketing and clinical family planning services in Eastern India. DKT provides family planning access to rural, poor and vulnerable populations in some of the most underserved areas of India. DKT Janani operates clinics in the states of Bihar, Jharkhand and Uttar Pradesh under the brand name of Surya Family Planning Clinics.

**About Family Planning Association of India:** Established in 1949, FPA India was instrumental in advocating for family planning to be introduced in the country's first Five Year Plan (1952). FPAI is a premier civil society organisation delivering essential health services focusing on sexual and reproductive health in over 18 states and union territories of India, in regions where key developmental indicators are poor and gender disparities are high. They include Bihar, Gujarat, Haryana, Jammu and Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Nagaland, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh, West Bengal and the Union Territory of Delhi.

**About Foundation for Reproductive Health Services India:** Foundation for Reproductive Health Services India is a leading Indian Non Governmental Organization working since 2009 to enable women and girls to exercise their reproductive rights and choice. FRHS India is India's No. 1 provider of clinical family planning services in the NGO and the private sector. Through public-private partnerships with the state

governments of Rajasthan, Bihar and Uttar Pradesh, FRHS India works towards improvement in accessibility and availability of quality family planning services in the states.

**About Parivar Seva Sanstha:** Parivar Seva Sanstha has the distinction of being a pioneering organization, since 1978, providing a range of quality, affordable reproductive health services and products in 14 states in India. Over the years we have expanded our role to include overall population and development issues. Parivar Seva is successfully running a variety of reproductive health projects like socially marketed reproductive health clinics in which apart from safe abortion & family planning services, other SRH issues amongst both women & men, such as basic health checkup, early detection of reproductive cancers, management of RTI/STI and infertility, gynae problems/surgeries are also addressed. Social marketing of reproductive health products; awareness, education & training on sexual & reproductive health, research & advocacy, along with development of enhanced management capacity to efficiently and effectively manage health population and development programmes, are some of the other objectives of Parivar Seva.

**About Action Research and Training for Health (ARTH):** ARTH's work on Research & Evaluation, Community Action, Training and Program Support spreads across the whole State of Rajasthan. For Services and Innovation, a field program is implemented in Southern Rajasthan with a population of about 64000. The field service and surveillance programme operates in two geographic clusters (total population about 64,000) spread over three blocks of southern Rajasthan. The blocks are Kumbhalgarh in Rajsamand district, Gogunda and Badgaon in Udaipur district. Despite high fertility and mortality, the largely tribal population of this area has limited access to rational (i.e. appropriate) health care. ARTH's field programme integrates clinic and extension services with culturally appropriate health communication activities. In addition to the tangible benefit of service to the population, the field programme allows ARTH to test innovative ideas in a manner that is sensitive to prevailing social, economic and gender constraints.
