

ABORTION

What **It Is.**
And What
It Isn't.

**Clear conversations
reduce stigma.**

Abortion Is

A medical
procedure

Part of
reproductive
healthcare

Time-
sensitive
care

A personal
healthcare
decision

It is provided by trained medical professionals.

— Abortion Is Not —

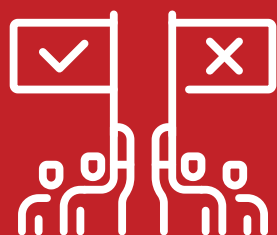

A public
debate

A “special
case” outside
healthcare

A moral
referendum

A topic for
comment-
section
approval

It belongs in clinics, not controversies.

Abortion is healthcare.

Like all healthcare, it deserves clarity,
dignity, and access.
